

Prescription Refills

Please allow us up to two days to process your refill request. Most refills are generally completed within one business day. To maintain the highest clinical standards, we require at least an annual exam for prescription refills. Your provider may require more frequent visits depending upon the medical condition.

The fastest way to obtain your refill is for your pharmacist to directly fax/email the request.

Prescription refills are a routine procedure and we gladly perform them during normal business hours. Any refill requests made after-hours (ie. on the emergency line) may incur an additional fee.
